Making more of workspace: Visplay introduces Spatio Office and Qubo Office

Weil am Rhein, 27 October 2026 – How will we work in the future, and what kind of spaces will we need? While ways of working continue to evolve, many offices remain organised around rigid layouts. With Spatio Office and Qubo Office, Visplay introduces two new modular office systems that offer new ways to use existing spaces.

An open floor plan allows for different uses, but it does not define where people can focus, collaborate or present ideas. The way a space is organised determines how different work areas take shape. Modular systems offer one approach by combining spatial division and integrated functions in a structure that can be adapted as needs change. This allows existing spaces to serve more purposes without necessarily requiring additional floor space.

Creating workspaces where they are needed

Not every work area needs a room of its own. Sometimes, a freestanding structure is enough to create the right setting. Spatio Office can be integrated into existing spaces with minimal structural intervention and does not require fixed connections to walls, ceilings or floors. Depending on the needs, it can create areas for focused work, creative processes or meetings. Its modular grid system allows the layout to be adapted as requirements change.

Making use of vertical space

Qubo Office makes more efficient use of existing space by working vertically. The system can be mounted directly to a wall or installed between floor and ceiling, combining spatial division with storage and other functions. This makes it possible to integrate additional features without taking up more floor space. The system can also be easily adapted as requirements change.

With these new office systems, Visplay brings its experience in modular spatial structures to the needs of contemporary work environments. The focus is not on creating more space, but on making better use of the space already available.

About Visplay

Visplay is a global developer and manufacturer of interior and space defining systems, headquartered in Weil am Rhein, Germany. For over 85 years, the company has set standards in design, functionality, and quality. Initially rooted in shopfitting systems, Visplay now offers a broad portfolio of solutions that extend far beyond the retail sector.

Visplay's products are known for their flexibility and adaptability, finding applications across various industries. They enable a multitude of design possibilities that meet the diverse demands of modern commercial spaces.
