MAKE SPACE SMART: New perspectives on workspaces at ORGATEC 2026

Weil am Rhein, 19 October 2026 – How can existing space be transformed into something more? At ORGATEC 2026, Visplay and Zumtobel are presenting a shared vision of how thoughtful spatial design can open up new perspectives for modern working environments.

Making efficient use of space while integrating different functions and creating room for interaction: modern working environments need to meet a wide range of requirements. Under the motto MAKE SPACE SMART, Visplay will demonstrate at ORGATEC 2026 how well-designed spatial structures can unlock the full potential of existing spaces.

New impulses for the office sector

The spotlight is on two new office systems and an update to the Omnio Office modular space system. The modular systems create structures that can adapt to changing needs without permanently defining how a space must be used. At a time when spaces need to be planned for the long term and investments carefully considered, this flexibility is becoming increasingly important.

Bringing expertise together

In collaboration with Zumtobel, Visplay is broadening its perspective on space. Modular structures meet integrated lighting and technical elements, creating new possibilities for flexible working environments. The combination opens up new opportunities to design spaces as interconnected environments rather than as a collection of individual products.

MAKE SPACE SMART represents a shift in perspective: moving beyond the question of how much space is available towards what that space can make possible.

ORGATEC 2026
27 to 30 October 2026
Koelnmesse, Hall 8.1 Stand D019/C018

About Visplay

Visplay is a global developer and manufacturer of interior and space defining systems, headquartered in Weil am Rhein, Germany. For over 85 years, the company has set standards in design, functionality, and quality. Initially rooted in shopfitting systems, Visplay now offers a broad portfolio of solutions that extend far beyond the retail sector.

Visplay's products are known for their flexibility and adaptability, finding applications across various industries. They enable a multitude of design possibilities that meet the diverse demands of modern commercial spaces.
