# Omnio Office

For decades, Visplay has been developing flexible, electrified retail systems that can be customised to the needs of users. In the era of New Work, we are now expanding our expertise to the office sector: Omnio Office is the answer to the growing demand for flexible working environments that support the dynamics of modern, hybrid workplaces.

## Your space, your vision

Omnio Office is a modular system that creates flexible and functional working environments. It combines static and mobile units that can be easily adapted to changing requirements. With integrated electrification, USB-C ports and acoustic elements, Omnio Office promotes productive working in a modern and pleasant atmosphere. Thanks to simple assembly and sustainable materials, Omnio Office is a future-proof solution for dynamic offices.

## Dynamics meets durability

Omnio Office combines stability and adaptability: static elements provide fixed structures, while mobile modules allow spontaneous adjustments. The skilful interplay of these opposites also facilitates the organisation of interior spaces tailored to agile working methods. As an extension of the “Omnio world”, Omnio Office now brings proven quality into the office.

# An office that embodies your ideas

One system for a complete office world: the mobile basic module from Omnio Office offers numerous options for creating exactly the space you need. New interior layouts can be configured again and again in just a few simple steps without any special tools. Creative minds require a suitable and inspiring environment for successful teamwork. Omnio Office's modular system is able to adapt to any situation – whether for meetings, workshops or focused workspaces.

# Organisation made simple

Cable clutter and complicated power routing are a thing of the past with Omnio Office: the base box of the modules enables uncomplicated routing of power and data cables. Extension cables and multiple sockets are also neatly concealed - without the need for raised floors or floor boxes. The system can be optionally equipped with an integrated 24 V power supply for the effortless connection of illuminated shelves, lighting and digital devices. USB-C slots support seamless digital working. These features set Omnio Office apart from other office systems. In addition, the flexibly integrated storage space ensures that everything is within reach but not in the way – and the lockable cabinets keep confidential documents and personal items discreetly stowed away.

# Open spaces, optimal accents

An appealing atmosphere makes all the difference: it promotes a greater sense of well-being while also demonstrably enhancing productivity. Omnio Office adds distinctive accents in the workplace: from modules with plant boxes for natural greenery to creative acoustic solutions. The acoustic panels from Impact Acoustic are made from recycled plastic and not only function as an aesthetic element, but also serve to dampen noise – ideal for active office environments. The panels can be used seamlessly in Omnio Office, both for presentation purposes or as partition modules.

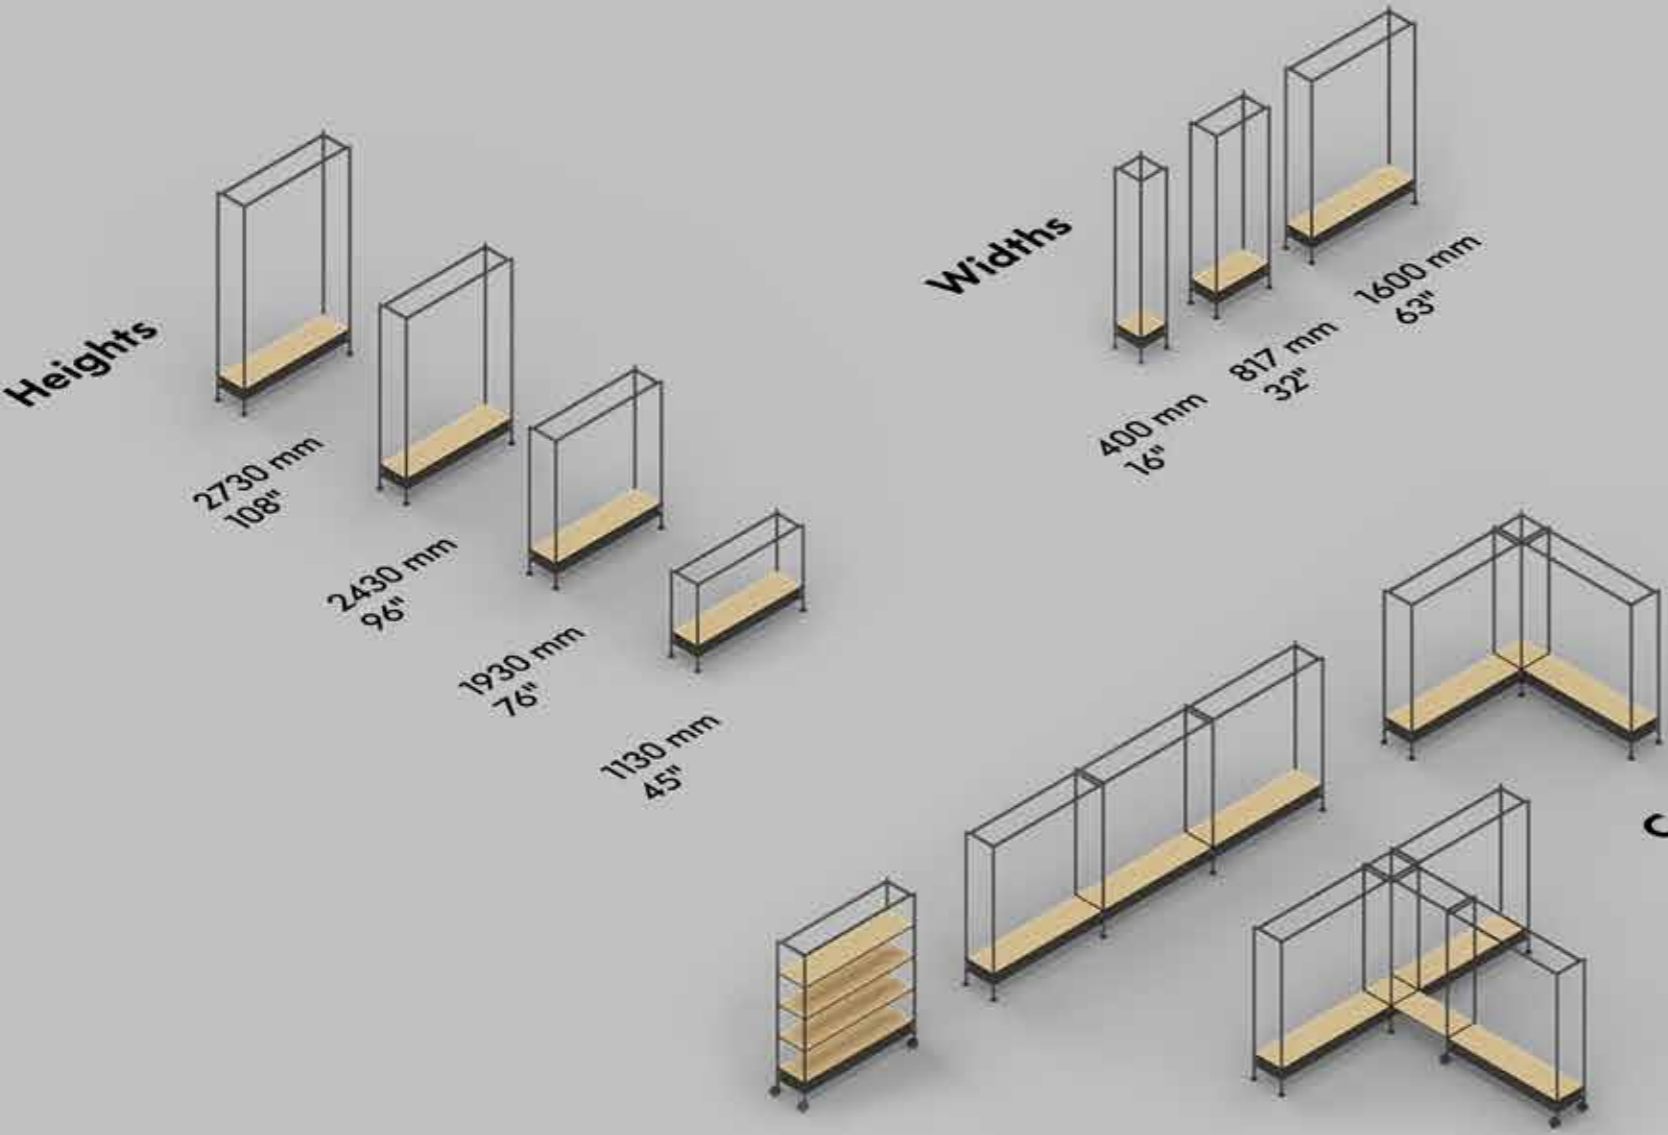

## Durable, flexible, future-proof

Omnio Office is state-of-the-art now and in the future: with its timeless design and robust quality, it will remain modern and highly functional for many years to come. Easy to transport and compact to store, the system adapts to all needs – even when relocating or for new tenants. Guided by our sustainability strategy, we rely on durable and recyclable materials to conserve resources and minimise waste – making Omnio Office a lasting and sustainable investment.

# System overview

# System logic

- Upright with 100 mm | 4" height increments
- Horizontal connections at varying heights
- Corner joints and extensions
- Integration of static and mobile structures
