

Flexibility Meets Office: Visplay Introduces Omnio Office

Weil am Rhein, October 1, 2024 – Visplay, a leading developer of modular retail systems, is leveraging its decades of expertise to introduce Omnio Office, setting new standards for modern, hybrid work environments. This innovative office system is Visplay’s response to the growing demand for dynamic, adaptable workspaces that align with the evolving requirements of the "New Work" model.

Modern offices are no longer just about desks: "Companies need the flexibility to respond to the ever-increasing and frequent challenges," emphasizes Visplay’s Managing Director, Christian Vetterer. With over 85 years of experience in flexible retail systems, Visplay has now applied its proven expertise to the office market. The Omnio Office system will make its debut at Orgatec 2024.

Dynamic Meets Enduring

Omnio Office is not just another office system—it is a comprehensive solution for companies seeking to create agile work environments. As new construction becomes increasingly rare, the focus now shifts to renovations and refurbishments Omnio Office makes these transformations quick and seamless. The system’s clever combination of static and mobile modules allows offices to adapt to any working style, from focused individual spaces to collaborative team zones.

“Quickly restructuring spaces, flexibly assembling teams, or swiftly responding to changes in employee numbers – these are the central requirements of modern workplace planning,” explains Vetterer. Omnio Office achieves this flexibility through Visplay’s patented connection system and an integrated power supply, both key features of the company’s innovative approach.

An Office That Brings Your Ideas to Life

Omnio Office turns the workplace into a creative playground. A whole office world can be created with a single system: The flexibly configurable modules can be effortlessly transformed into room dividers, presentation areas, or design elements. Plant grids bring vibrancy into the space, while smart acoustic solutions ensure a quiet environment. The customizable acoustic panels, available in various colors, can be easily integrated into the system’s rails, allowing for various combinations, from subtle to striking. This thoughtful design not only inspires creativity but also fosters a pleasant and productive atmosphere.

Technology and Order in Perfect Harmony

Cable clutter and overcrowded desks are common problems in many offices. Visplay offers a solution with Omnio Office by providing a tidy, organized workspace. Thanks to the integrated 24V power supply and USB-C connections, the system is perfectly equipped for the demands of the digital work environment. "Floor sockets are no longer needed, as power is always available exactly where it's needed – whether it's 230/110V or 24V," Vetterer explains.

Additionally, Omnio Office offers well-designed storage solutions that keep essential items within easy reach yet discreetly out of sight, demonstrating Visplay's deep understanding of both retail and office needs.

Durable, Flexible, and Future-Proof

Omnio Office is not only "state-of-the-art" today but will remain so in the future. Visplay focuses on timeless design and robust quality, ensuring that the systems remain modern and functional for years to come. The system is easy to transport and space-efficient, making it adaptable to changing needs, whether during a move or for new tenants.

In line with its circular economy strategy, Visplay uses durable, recyclable materials, conserving resources and reducing waste. Omnio Office is a sustainable investment that offers long-term value for companies.

About Visplay

Visplay is a global developer and manufacturer of interior and space defining systems, headquartered in Weil am Rhein, Germany. For over 85 years, the company has set standards in design, functionality, and quality. Initially rooted in shopfitting systems, Visplay now offers a broad portfolio of solutions that extend far beyond the retail sector.

Visplay's products are known for their flexibility and adaptability, finding applications across various industries. They enable a multitude of design possibilities that meet the diverse demands of modern commercial spaces.
