

NeoCon 2025: Visplay Introduces Movement into the Office

Weil am Rhein, April 9, 2025 – A future-ready work environment starts with the right infrastructure. At NeoCon 2025 (June 9–11 in Chicago), Visplay presents Omnio Office: a modular office system now launching in the U.S.—designed to create dynamic spaces without major renovations.

Less renovation, more transformation

Workplaces are constantly evolving, demanding adaptable environments. Drawing on nearly 90 years of expertise in modular retail systems, Visplay brings its understanding of interior dynamics into the office. Omnio Office builds on the proven Omnio shelving and structural system, reimagined for today's workplace. Combining mobile and fixed modules, the system can be reconfigured effortlessly—without special tools or structural changes. The result is an infrastructure that grows with your needs and supports businesses over time.

Flexible. Durable. Thoughtfully designed.

Omnio Office replaces conventional office furniture with a system that delivers more. It integrates structure, technology, and aesthetics into a modular kit-of-parts. With its timeless design and robust construction, it remains relevant and ready for use over many years. Built with recyclable, long-lasting materials, Omnio Office is also a sustainable investment.

A complete system for the modern workplace

Today's offices require more than desks. Known for precision engineering and innovative design, Visplay has equipped Omnio Office with smart features such as integrated power supply, USB-C connectivity, acoustic elements, lighting, and greenery. It brings the entire office ecosystem into one coherent system.

Debut in Chicago

Following a successful European launch, Visplay is bringing Omnio Office to the U.S. market. At NeoCon 2025, the modular office system will make its North American debut—offering a new vision for flexible, forward-thinking work environments. For offices that adapt and evolve.

About Visplay

Visplay is a global developer and manufacturer of interior and spatial systems headquartered in Weil am Rhein, Germany. For over 85 years, the company has set benchmarks in design, functionality, and quality. Originally specializing in store construction systems, Visplay now offers a broad portfolio that extends far beyond retail, catering to the diverse needs of modern business environments.
