

**Invisible 3** is a horizontal support system for lightweight merchandise. The 3-mm narrow slits lend a serene character to the product display. Merchandise supports, such as clamping brackets (for aluminium or glass shelves), front arms, hanging rails, hooks or spectacle frame holders, can be inserted anywhere along the profile. The system rails are attached to a substructure, interspaced with wooden panels, or can alternatively be used as single-sided or double-sided profiles in mid-floor structures. A panel fitted with Invisible 3 can also be hooked into an existing Invisible 6 P/L wall profile to display accessories.
